USED PARTS, IF POSSIBLE.....

WHAT A GOOD IDEA!

Increasing numbers of agricultural mechanisation companies are choosing the durable, budget-friendly option of used spare parts for their repairs. Using used parts, or "green parts" as they are also known, enables you to kill two birds with one stone. You can save 50 percent of the cost by repairing damaged vehicles with used parts. And moreover, recycling parts is beneficial to the environment because the parts in question do not end up as waste.

Agri-Parts is the Dutch market leader for used parts for tractors and telehandlers. We have been a trusted Partner for the European agricultural mechanisation branch for more than 55 years and we engage in the purchase and sale of parts and damaged vehicles outside Europe too. As a result, of our global network, Agri-Parts is able to provide attractive exchange and aftermarket parts as well.

**PARTNERS IN PARTS**

Our used parts help you on your way - quickly. We feel that green parts have to be good and that it should be possible to deliver them just as quickly as new parts. In most cases we deliver within 24 hours in the Netherlands and within 36 hours in Germany and Belgium.

In addition, Agri-Parts gives a three-month guarantee on the parts delivered. We are almost always able to provide original A-brand parts from our large range (more than 5000 m<sup>2</sup> of parts) or, alternatively, new parts if required.

Furthermore, Agri-Parts also guarantees that all the parts have been dismantled with due care for the environment.

Meindersma Agri-Parts is the only Dutch tractor dismantling company with the Quality Care Dismantling 2 \*\* certificate (KZD).
